GNANA PRAKASH GAJULA

SOC Analyst

7993089884 • gnanaprakash2956@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Entry-level SOC Analyst with hands-on internship and home-lab experience in SIEM monitoring, log analysis and threat hunting across Windows and Linux environments. Practical exposure to Splunk and IBM QRadar for alert triage, incident investigation and escalation, with working knowledge of MITRE ATT&CK-based detection mapping. Comfortable analysing Windows Event Logs and Sysmon telemetry to identify suspicious behaviour, and keen to build a career in defensive cybersecurity operations.

TECHNICAL SKILLS

SIEM: Splunk Enterprise, IBM QRadar, Microsoft Sentinel (Basic)
Security Monitoring: Alert Triage, Log Analysis, Threat Hunting, Incident Investigation
Endpoint: Microsoft Defender XDR, Sysmon, Wazuh, CrowdStrike (Basic)
Networking: TCP/IP, DNS, HTTP/HTTPS, DHCP, SMTP, SSH
Security Tools: Wireshark, tcpdump, VirusTotal, Any.Run, AbuseIPDB
Frameworks: MITRE ATT&CK, Cyber Kill Chain
Operating Systems: Windows, Linux
Scripting: Python, PowerShell, Bash

PROFESSIONAL EXPERIENCE

SOC ANALYST INTERN | Cartel Software Pvt. Ltd, Bengaluru *August 2026 – Present*

- Monitored SIEM alerts in Splunk and IBM QRadar and performed initial alert triage as part of hands-on internship experience.
- Investigated phishing emails and suspicious indicators, escalating confirmed incidents according to defined SOPs.
- Investigated endpoint alerts using Microsoft Defender XDR and correlated findings with Sysmon and Windows Event Logs.
- Documented investigation findings, incident details and remediation steps for handover and reporting.
- Gained exposure to SOAR concepts and playbook-driven response workflows during SOC operation

PROJECTS

SOC Home Lab – Threat Detection & Log Monitoring

- Built a home lab using Windows, Linux, Splunk and Sysmon to simulate centralised log collection and monitoring.
- Created detections for brute-force login attempts using Windows Event ID 4625 and investigated successful/failed logons via Event IDs 4624 and 4625.
- Investigated suspicious PowerShell activity using Event ID 4104 and analysed Sysmon Event IDs 1, 3, 7 and 11 for process, network, image-load and file-creation activity.
- Performed threat hunting for malware execution, persistence and suspicious outbound/beaconing traffic, enriching indicators of compromise using VirusTotal.
- Mapped identified activities to MITRE ATT&CK techniques to support detection and investigation logic.

CERTIFICATIONS

- Networking Basics
- IT Support Essentials
- Cybersecurity Essentials

EDUCATION

B.Tech, Computer Science Engineering (Artificial Intelligence) *2022 – 2026*
CGPA: 7.25/10
